

Karera has been appointed Systems Integrator for Federal Signal Products

who produce Community Early Warning Systems and communications products that enable communities and towns to be notified via extremely loud public sirens or wireless desktop alert devices. These devices can be activated by emergency services to sound at a moments notice. Communities can then respond or even evacuate depending on the type of pre-defined sound from its siren or speakers.

2 HP Omni-directional Siren

Federal Signal's Model 2, outdoor warning is an Omni directional siren capable of producing intense warning signals over a wide area. The highly efficient model 2 produces a single tone sound level of 102 dBC at 100 feet on axis while making moderate power source demands. The siren can be installed on a roof or a utility pole.

A timer can be purchased separately to enable the siren to produce 1 to 3 signals.

The AR timer can produce a timed WAIL or STEADY signal, and the FC will produce a WAIL, STEADY or FAST WAIL signal.

Features

- **Designed for outdoor warning**
 - **High-efficiency design makes moderate power demands**
 - **Powerful outdoor siren with Omni directional coverage**
 - **120/125 or 240/250 volt, universal motor that can operate from 25-60 Hz AC**
- Pole mount option available - roof mount is standard**
